## MIXED HARDWOOD CORE PLYWOOD

Reinforced is a multipurpose high quality plywood range selected for various applications where strength and resistance are essential.

Our hardwood core combines poplar and eucalyptus globulus sourced from European fast-growing plantations.

Its multiply composition is perfect for exposed edges in artistic furniture or fixtures.

Plywood panel with exceptional surface quality, uniform finish, and great stability. Reinforced core with high-quality veneers that stand out for their exceptional bond quality, and properties of uniformity and ease of machining.

Surface available in birch and maple, ready-to-use for decorative applications without any further sanding and processing. Also available with poplar faces as an optimal platform for different overlaying methods.
