## Multipurpose Panels

Resistant to the effects of extreme moisture and natural heat\*

[stylelite.net](http://stylelite.net)

MADE FOR NORTH AMERICA

## StyleLite Multipurpose Panels

StyleLite Multipurpose Panels (MPP) are designed to provide a highly durable panel option ideal for various applications in interior and covered exterior environments especially where extreme moisture and natural heat are prevalent.

Two products make up the StyleLite MPP range, each comprising different types of EGR manufactured waterproof StyleLite skins laminated with high-performance polyurethane (PUR) adhesive to our high-density, weatherproof composite core specially formulated for superior heat stability, resistance to the effects of extreme moisture, structural capacity and ease of fabrication.

## StyleLite Carcass MPP

StyleLite Carcass MPP are manufactured from our textured high scuff resistance StyleLite Alabaster ABS skins in conjunction with the high-density core resulting in an undercover weatherproof product ideal for cabinetry drawer boxes, carcasses, shelves and fixtures.

## StyleLite TruMatte MPP

StyleLite TruMatte MPP combine durable StyleLite TruMatte skins with our high-density core resulting in an undercover weatherproof product ideal for cabinetry doors, drawer fronts, end panels and virtually any other component that requires a beautiful super matte finish. Available in four modern and on trend super matte colors, StyleLite TruMatte MPP is the perfect panel product for your project where the requirement is for a superb contemporary finish combined with excellent durability.

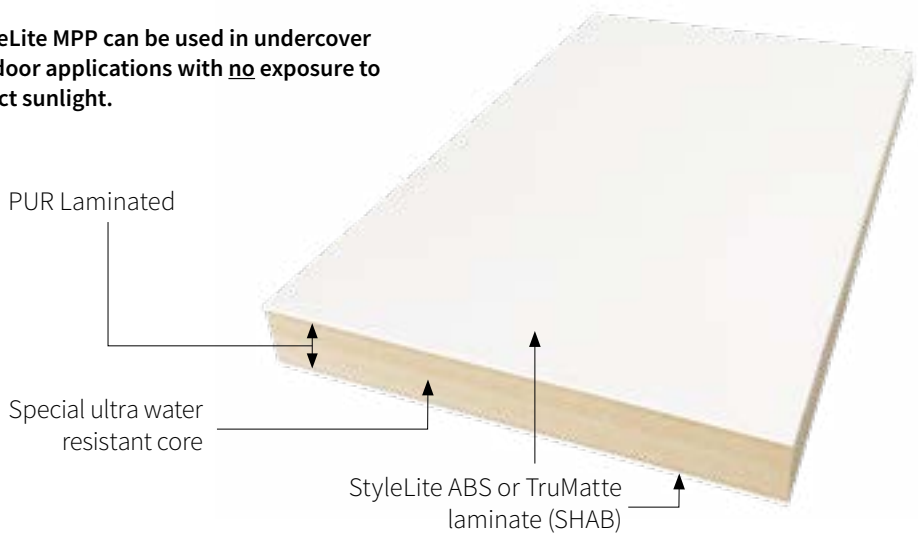

When combined, StyleLite Carcass and TruMatte MPP make for a brilliant choice where cabinet and fixture projects require beauty with durability especially in high moisture and natural heat prone environments.

**\* StyleLite MPP can be used in undercover outdoor applications with no exposure to direct sunlight.**

## Superior Features

- Ideal for residential, commercial and institutional applications
- Excellent resistance to moisture and natural heat\*
- Perfectly balanced panels
- Highly resistant to fingerprints
- Lightweight
- Highly resistant to chipping
- Easy to fabricate
- Compatible with standard hardware
- Highly durable with excellent scuff and scratch resistance
- Thermoformable to minimize seams and joints. StyleLite Carcass and TruMatte MPP are bendable using suitable methods as specified by EGR
- For interior and undercover exterior use. Completely under cover and not exposed to direct sunlight
- Edge with standard edge band procedures. Best practice is to use matching or contrasting StyleLite reactive layer edge band or StyleLite preprimed edge band and PUR adhesive

**\* StyleLite MPP can be used in undercover outdoor applications with no exposure to direct sunlight.**

## Color Range

### StyleLite Carcass MPP

Textured

**Alabaster**
